SPECIALIZED QUALIFICATIONS:

I was assigned to work with the Pasadena Police Department's Air-Operations Section as a Tactical Flight Officer and a member of the Foothill Air Support Team (FAST), representing the Arcadia Police Department. As a member of the air crew I was responsible for pre and post-flight duties related to the aircraft. In flight I monitored 12 – 15 radio frequencies and was responsible for all air to ground communications with allied law enforcement, including coordinating pursuits, high-risk stops, containments, and search efforts. I was responsible for evaluating calls for service and making response decisions for the aircraft and crew based on call priority. I operated the in-flight GPS navigation system, night-sun spotlight, camera and FLIR systems. I was qualified in the use of advanced military night vision equipment during air support operations in conjunction with the above aircraft systems.

I was assigned to work with the high-tech crimes unit conducting electronic, computer, and cell phone forensics. I assisted with the Los Angeles County multi-agency computer forensics task force comprising the Los Angeles County District Attorney's Computer Emergency Response Team (CERT), and the Los Angeles region, multi-agency, Internet Crimes Against Children (ICAC) task force.

In my service history working patrol and traffic assignments, I investigated approximately 50 to 100 traffic collisions per year for 12 years. As the Lead Traffic Investigator, I was responsible for reviewing, analyzing, investigating, or reconstructing approximately 500 to 800 collisions per year. I have reconstructed numerous major traffic collisions involving major injuries and fatalities.

As a Traffic Enforcement Officer I gained thousands of hours of traffic and related experience. I have over 7,500 hours of professional motorcycle training and riding experience.

I designed and implemented a traffic collision report narrative system for use by law enforcement personnel, in conjunction with the CHP 555 traffic collision report forms. I submitted the report forms to, and they were subsequently accepted by, the CHP Statewide Integrated Traffic Records System for documenting collisions ranging from minor to fatalities. These forms were adopted for use by the Arcadia PD and a number of allied agencies.

I am experienced in generating factual diagrams and forensic mapping using traditional and state of the art methods. I am experienced using advanced reconstruction software for calculating times, distances, speeds, and other pertinent information required to reconstruct traffic collisions. I have experience diagramming collision scenes since 1995. I have been forensically mapping and reconstructing collision and crime scenes since 2004.

I was assigned the primary responsibility of investigating and filing for prosecution, crimes involving vehicle thefts, vehicle burglaries, driving under the influence, traffic collisions, vehicular homicide and high tech-crimes. I also investigated, assist and/or filed residential burglaries, commercial burglaries, petty & grand thefts, fraud, homicide, assaults, violent crimes, and grand theft auto cases.

SPECIALIZED QUALIFICATIONS (cont.):

I have reconstructed the following types of collisions:

- Auto v Auto
- Auto v Pedestrian
- Auto v Bicycle
- Auto v Fixed Object (Pole / Tree / Wall / Building)
- Auto v Motorcycle
- Solo vehicle / motorcycle / bicycle
- Rollovers
- Auto v moped / scooter

I was the team leader for the Arcadia Police Department's Major Accident Investigation Team (MAIT) from 8/2007 to 8/2017. I was responsible for the team's equipment, deployment and investigative efforts, ongoing member training, and follow up investigations. MAIT handled all major accident investigations within the City of Arcadia and was periodically called upon to assist allied agencies. Additionally, the MAIT team was generally deployed to all major crime scenes for the purposes of scene diagramming and forensic mapping.

I have participated in numerous vehicle acceleration/deceleration tests, skid correlation studies, vehicle inspections and commercial vehicle inspections (in partnership with the California Highway Patrol.) I have extensive experience with DUI (Driving Under the Influence of drugs and/or alcohol) criminal cases.

I have testified in court on a wide variety of cases, and as an expert witness on traffic related issues, collisions, vehicular homicide, and traffic collision reconstruction.

As an Investigator with the Orange County District Attorney's Office – Vehicular Homicide Unit, I investigate and reconstruct vehicular homicide cases. I assist in prosecution and evaluating cases with DA's to consider appropriate charging, and recommend dismissal or lessening of charges in some cases. I evaluate the reconstruction work of law enforcement and defense experts. I provide expert testimony in criminal cases. I am called upon to assist allied agencies and prosecutors offices with search warrants, reconstruction, analysis, and case consultation. This includes municipal agencies within counties of Orange, Los Angeles, and San Bernardino, as well as the Los Angeles County District Attorney's Office and the San Bernardino County District Attorney's Office.
